

Zoning

Custodian: The Corporation of the District of Saanich, GIS Section

Publish Date: January 1, 2003

Abstract: Zoning represents areas that comprise all land use zones within the District of Saanich. A zone regulates the use of land and the location, use, size and shape of buildings and structures erected thereon (Saanich Zoning Bylaw #8200). For example, a zone can regulate minimum lot area and/or frontage length for building a house or other building, maximum building size, or minimum setbacks from a lot boundary for building a structure.

Purpose: Zoning provides control to what buildings can be built on a lot and what they can be used for. Zones are regulated with regard to the promotion of health, safety, convenience, and welfare of the public; the prevention of the overcrowding of land and the preservation of the amenities peculiar to any zone; the securing of adequate light, air, and access; the value of the land and the nature of its present and prospective use and occupancy; the character of each zone, the character of the buildings already erected and the particular suitability of the zone for specific uses; the conservation of property values; Official Community Plan, Local Area Plan, and Action Plan policies.
